Re: James Hotchkiss

To Whom It May Concern:

I have worked with Jamie Hotchkiss at Huntley Middle School and Heineman Middle School for ten years. I am impressed with his ability to "practice what he teaches," and his concern for educating students about the sciences. Jamie has a unique ability to use technology to create interest in and help students see the "bigger picture" in the topics he covers in class. Outside of class he provides many opportunities for his students to learn about the environment and their world.

Any school would be richer for having such a caring and creative teacher such as Jamie on their staff. I have found him to be easy to work with, and would highly recommend him as a science teacher.

Sincerely,

A handwritten signature in cursive script that reads "Kay Mills".
